

Tile cutting machine 300 mm; 400 mm
600 mm

(36024, 36034, 36035)

Cutting length: max 300 mm / 400 mm / 600 mm
The thickness of the tile: max 10 mm
Spare cutter wheels: 16 mm / 6 mm

USE:

Tile cutting machines are designed for cutting ceramic tiles or other similar materials made of ceramics.

DIRECTIONS FOR USE:

Put the cutting machine on a fixed and level surface, attach the cut material (wall tile or tile) that you want to cut or otherwise edit section, the metal base cutter. Then hold the handle, which controls the cutting wheel and one continuous stroke cut the material and break it.

We offer the opportunity to order spare cutting wheel.
